

AD Series Open Frame Displays

Reliability, Customisation & Value

Manufacturer of LCD Display Solutions in China & Europe
HIGH BRIGHT
SHELF-EDGE
INTERACTIVE
CUSTOM

The AD Series Open Frame range delivers displays purpose-built for integration into POS and POP structures, EPOS systems, industrial applications, museum exhibits and more. We are very proud that there are thousands of AD Series open frame displays housed in structures all over the world. We are even prouder of our record for exceptionally high levels of reliability.

MANUFACTURING
 Low cost, volume production in our China factory

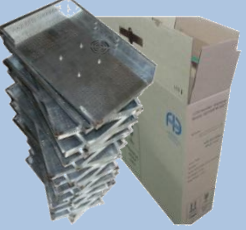

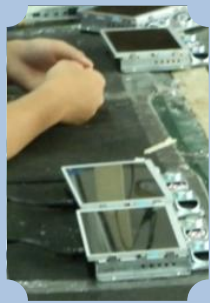

Standard or custom displays?

We want to meet your display requirements and your budget requirements. One of our standard Open Frame displays, all of which have been designed for customer applications, may meet those needs perfectly.

However, you may have particular requirements for size, functionality, panel specification or certifications. You may need a product that has guaranteed design stability for repeat orders. In many of these cases we will deliver a custom-manufactured product to ensure you are delivered exactly what you need.

All standard and custom manufactured displays are produced on the same production lines and follow the same rigorous standards of quality control, burn-in and finish.

Volume production can be completed from as little as 6 weeks from agreement of sample and often less for repeat orders.

WHY CHOOSE AD SERIES OPEN FRAME?

SLIM & COMPACT PROFILES

FULLY ENCLOSED PCBs

SECURITY & ACCESS FEATURES

PROVEN BOARDS & COMPONENTS
